

# ElmScan 5<sup>tm</sup> Quick Start Guide

## 1. Install ScanTool.net software

Insert the software CD in your CD-ROM drive. The scan tool selection menu will automatically appear:

If the menu does not appear, click **Start→Run**, type **E:\setup.exe** (where **E** is the drive letter of your CD-ROM drive), and click **OK**.

Click on the icon labeled "ElmScan 5", to display the software selection menu:

Click on "ST.net v1.11 (Win)", and follow the prompts to install the software.

## 2. Locate the diagnostic connector.

The 16-pin D-shaped diagnostic link connector (DLC) should be located in the passenger or driver's compartment in the area bounded by the driver's end of the instrument panel to 300 mm (~1 ft) beyond the vehicle centerline, attached to the instrument panel and easy to access from the driver's seat. The preferred location is between the steering column and the vehicle centerline.

## 3. Connect scan tool to the DLC

Follow connection diagram (directly below) to connect ElmScan 5 to the diagnostic connector using the black OBD-II cable (steps **A** & **B**).

Watch the LEDs as you are performing step **B**. The green "Power" LED will light up, and the red and orange Tx/Rx LEDs will cycle on and off.

## 4. Connect scan tool to the PC

Connect ElmScan 5 to your PC's serial port using the gray serial cable (steps **C** & **D**).

*Note that some laptops do not have a built-in serial port. Inexpensive USB to Serial converters are available from the ScanTool.net website, or your local computer store.*

## 5. Launch ScanTool.net software

To launch the software, click on **Start → Programs → OBD-II Software → ScanTool.net → ScanTool.net v1.11 for Windows**.

## 6. Technical support

Should you run into problems, technical support is just a click away:

- **Knowledgebase** - contains answers to the most commonly asked questions, general information about OBD-II, and troubleshooting information.
- **Forum** - allows you to share information and get support from other ElmScan 5 users.
- **Web Support** - submit a request for help to our team of technical support representatives.

All of the above resources can be accessed from our website: <http://www.ScanTool.net>
